# 1 Introduction

## 1.1 Scope of this document

This document has the purpose to collect requirements on Methodology and Templates which are

- unspecific to single documents

OR

- specific to parts of the AUTOSAR meta-model relevant for almost all AUTOSAR templates

## 1.2 Document Conventions

The representation of requirements in AUTOSAR documents follows the table specified in [TPS\_STDT\_00078], see Standardization Template, chapter Support for Traceability ([1]).

The verbal forms for the expression of obligation specified in [TPS\_STDT\_00053] shall be used to indicate requirements, see Standardization Template, chapter Support for Traceability ([1]).

### 1.3 Guidelines

Existing specifications shall be referenced (in form of a single requirement). Differences to these specifications are specified as additional requirements. All Requirements shall have the following properties:

- **Redundancy**  
Requirements shall not be repeated within one requirement or in other requirements.
- **Clearness**  
All requirements shall allow one possibility of interpretation only. Used technical terms that are not in the glossary must be defined.
- **Atomicity**  
Each Requirement shall only contain one requirement. A Requirement is atomic if it cannot be split up in further requirements.
- **Testability**  
Requirements shall be testable by analysis, review or test.
- **Traceability**  
The source and status of a requirement shall be visible at all times.

## 1.4 Requirements Tracing

The following table references the requirements specified in [2] and links to the fulfillment of these.

Requirement	Description	Satisfied by
[RS_Main_00080]	AUTOSAR shall provide means to describe a component model for Application Software	<a href="#">[RS_MTG_00001]</a>
[RS_Main_00190]	AUTOSAR shall support standardized interoperability with non-AUTOSAR software	<a href="#">[RS_MTG_00003]</a>

## 2 Requirements

### 2.1 Category: AUTOSAR Main Requirements

This section re-defines requirements from relevant requirements defined in `Main Requirements` [3].

#### 2.1.1 Re-usability

**[RS\_MTG\_00001] AUTOSAR shall ease the re-usability of software and its concepts and implementations** [

<b>Type:</b>	valid
<b>Description:</b>	AUTOSAR shall ease the re-usability of software and its concepts and implementations
<b>Rationale:</b>	See requirement [RS_Main_00080].
<b>Use Case:</b>	See requirement [RS_Main_00080].

#### 2.1.2 Different functional domains

**[RS\_MTG\_00002] AUTOSAR shall provide a software architecture that is applicable across different functional domains** [

<b>Type:</b>	valid
<b>Description:</b>	AUTOSAR shall provide a software architecture that is applicable across different functional domains

#### 2.1.3 Interoperability with legacy software

**[RS\_MTG\_00003] AUTOSAR shall provide interoperability with legacy software** [

<b>Type:</b>	valid
<b>Description:</b>	AUTOSAR shall provide interoperability with legacy software
<b>Rationale:</b>	See requirement [RS_Main_00190].
<b>Use Case:</b>	See requirement [RS_Main_00190].

## 2.2 Category: Variant Handling

This section defines requirements on AUTOSAR Variant Handling.

### 2.2.1 Supported combinations of System Constant Value

**[RS\_MTG\_00005] Describe supported combinations of System Constant Value of an Software Component Type** [

<b>Type:</b>	valid
<b>Description:</b>	The Generic Structure Template shall support the description of the allowed combinations of System Constant Values of a Software Component Type.
<b>Rationale:</b>	Avoid illegal configuration of a software components, Enable selection of an appropriate Software Component Type.
<b>Use Case:</b>	–
<b>Dependencies:</b>	–
<b>Supporting Material:</b>	[RS_SWCT_03100]

**[RS\_MTG\_00006] Describe supported combinations of System Constant Value of an InternalBehavior** [

<b>Type:</b>	valid
<b>Description:</b>	The Generic Structure Template shall support the description of the allowed combinations of System Constant Values of an InternalBehavior.
<b>Rationale:</b>	Avoid illegal configuration of a Software Components Enable selection of an appropriate InternalBehavior.

**[RS\_MTG\_00007] Describe supported combinations of System Constant Value of an Implementation [**

<b>Type:</b>	valid
<b>Description:</b>	The Generic Structure Template shall support the description of the allowed combinations of System Constant Values of an Implementation.
<b>Rationale:</b>	Avoid illegal configuration of a Software Components Enable selection of an appropriate Implementation.

]()

**[RS\_MTG\_00008] Describe Special Data which only applies for specific variants [**

<b>Type:</b>	valid
<b>Description:</b>	The Generic Structure Template shall support the description of Special Data (used to store arbitrary data for which no other element exists of the AUTOSAR data model) being subject of variability. Thereby values of special data can be subject of variability and / or the existence of parts of the Special Data can be subject of variability
<b>Rationale:</b>	Describe proprietary non-AUTOSAR information which relates to variant rich AUTOSAR models.
<b>Use Case:</b>	–
<b>Dependencies:</b>	–
<b>Supporting Material:</b>
