

E2E\_PXXmSourceCheck  
()

"XX" stands for one method profile.  
Placeholder are defined on profile  
level.

Copy MessageID from bytestring Data to output argument  
SourceID in Big Endian order.

MessageID is 28 bits long. Bytes must be extracted from  
position Offset + PXXMMESSAGE\_POS to Offset +  
PXXMMESSAGE\_POS + 3.

MessageID holds the 28 least significant bits starting at  
position Offset + PXXMMESSAGE\_POS.
