

Concept 737: SOME/IP Meta-Data

Günter Fischer

19 Dec 2025

SOME/IP Meta-Data

Release planned for R26-11

Challenge	Solution
<p>There is no possibility to extend SOME/IP messages with auxiliary information like:</p> <ul style="list-style-type: none">- Context IDs for distributed traces- (Source) Timestamps- Unique message identifiers- User-defined data <p>in the SOME/IP protocol. This is a feature that is present in other middle ware standards like DDS.</p>	<p>Introduction of new message types to describe meta data between header and payload. The meta data shall consist of a lightweight subprotocol, which allows combining multiple meta data fields.</p>

USER BENEFIT:

Improve data collection and debugging.
