Dynamic PNC for CAN

Release planned for R26-11

Challenge	Solution
<p>Following a hardware or software update (e.g. adding ECU after SOP), it may be needed to perform changes in the network management.</p> <p>Partial Networking allows an effective power management but currently the configuration is static. Any change requires reprogramming several ECUs, but sometimes it is not possible/desirable to reprogram them.</p>	<p>Introduce Dynamic Partial Networking Clusters (D-PNC):</p> <ul style="list-style-type: none">• Using diagnostic commands an ECU can be added/removed to a PNC• PNC can be changed without reprogramming any ECU

Flexibility for Post-SOP E/E modification with minimum effort.
